US 10Y Yield RATES YIELDS	4.5	4.5	4.75	Monthly	%	Jan 2025 (2)	BLS	VERIFIED

MACRO INDICATOR CADENCE GUIDE & PREVIOUS / FORECAST / ACTUAL INTERPRETATION:

ĩŁ½ Monthly Data Required: High-velocity indicators like Non-Farm Payrolls (NFP), Consumer Price Index (CPI), PPI, and Retail Sales need monthly series to track short-term inflation and economic activity.

ĩŁ½ Weekly Data Required: High-frequency data such as Initial Jobless Claims and Energy Inventories provide early turning-point signals before monthly summaries appear.

ĩŁ½ Quarterly Data (3rd Month / 6th Month Revision Data): GDP and Current Account balance are reported quarterly with 1st estimate (Advance), 2nd estimate (2nd month), and final revision (3rd month).

ĩŁ½ Annual Data: Structural metrics like fiscal debt-to-GDP and annual benchmark revisions anchor long-term sovereign solvency.

ĩŁ½ Economic Surprise Dynamics: Previous = Prior period baseline; Forecast = Consensus expectation; Actual = Official print. When Actual exceeds Forecast (Positive Surprise), institutional trading bias shifts.

ĩŁ½ Prime Pip FX verifies all macroeconomic inputs against official statistical desks with zero automated distortion.

DATA INTEGRITY GUARANTEE:

Prime Pip FX strictly maintains authentic economic indicator fields: missing values are never substituted with zero, forecasts are never treated as actuals, and units retain their authentic economic meaning for institutional trading decisions.
